

Maintenance Adjusters – 514

Machine adjusters are responsible for maintaining and optimizing the performance of the assigned area. The central responsibilities include preventive maintenance on a cyclical basis, emergency maintenance as breakdowns occur, and scheduled weekly maintenance. They may perform construction or mechanical rearrangement tasks. They maintain, troubleshoot, and repair high speed packaging equipment. They repair/maintain electronic and electrical equipment (such as machine controls) following blueprints and manufacturers' specifications and using hand tools and test instruments.
